This model was made for someone who has sent a request to my email a week ago. This building was a cake store in the Animated series My Little Pony: Friendship is Magic. As usual I did not immediately make the model on demand, but this time the requested object is very beautiful. Had long since I did not make a model of a building, so the process of making this pattern is a lot of fun. I am quite satisfied with the end result. The 3D Model is made with fairly easy, only takes about a day to make a simple model of this building. But the template coloring takes much longer. This model has 5 pages of pattern with bright colors, the same as to the cartoon version.
