The final part is ready, part 3 of 3. This part contains 10 pages of patterns, the parts are simpler compare to Going Merry in the same section. Assembled model has 58 cm in height, 47 cm length and 30 cm width. These model parts use a lot of cylinder or tube shapes, so you have to choose the correct paper weight, I recommend to use 120 gram. All three sails are double sided and you can replace flag beams with toothpicks.
