

Bajaj **BGG**

BAHAN BAKAR GAS
GAS FUELED BAJAJ

Bajaj (pronounced "ba-jai") is a three-wheeled vehicles that are widely used in Jakarta. Besides in Jakarta, bajaj is also found in the city of Pekanbaru and Banjarmasin and several districts in Indonesia's capital. Later, as it is known as a source of pollution, Now a large number of Bajaj in Jakarta replaced with a gas fueled bajaj more environmentally friendly. Bajaj passenger capacity is two, or plus one small child, all of which will sit behind the three-wheeler driver. Two step three-wheeler's engine is deafening. However, because of the relatively small physique, bajaj can be relied upon to break through bottlenecks capital city.
